

DIYOUVA CHRISTA NOVITH

[LinkedIn](#) | [Portofolio](#)

EDUCATION

Carnegie Mellon University, Heinz College, Pittsburgh, PA

Expected 5/2027

Master of Science in Public Policy and Management – Data Analytics

STAN Polytechnic of State Finance, Jakarta, Indonesia

6/2019 – 10/2021

Bachelor Degree in Applied Accounting

SKILLS

Programming & Analytics: Stata, Python, R, SQL, Excel, LaTeX, Tableau

Data Engineering: Oracle, PostgreSQL, Dataiku, JSON, HPC (Bash/Linux), ETL Pipelines

NLP: Large Language Models, RAG Architecture, Doc2Vec, Clustering, Legal-BERT

Modeling: Causal Inference, Partial Equilibrium, Cost Optimization, Monte Carlo Analysis

PROFESSIONAL EXPERIENCE

Carnegie Mellon University, Pittsburgh, USA

1/2026 – 3/2026

Graduate Teaching Assistant

- **Quantitative Analysis:** Guided graduate students in economic modeling and quantitative reasoning, strengthening applied problem-solving in policy contexts
- **Analytical Evaluation:** Assessed assignments and exams, providing structured feedback to improve rigor, clarity, and interpretation of empirical results

Ministry of Finance, Jakarta, Indonesia

5/2022 – 8/2025

Data Analyst, Directorate General of Customs and Excise

- **Quantitative Forecasting:** Designed real-time fiscal dashboards and regression forecasts, improving budget accuracy and cutting decision cycles by 15%
- **Data Engineering:** Automated data pipelines in Python and StreamSets; created KPI reports adopted by senior leadership, reducing data latency by 40%

SELECTED AWARDS

Best Paper, 4th WCO RTC Asia Pacific International Conference

10/2024

Presented and Published Scientific Journal with title Harmonized System Code Recommendation: A Multi-Class Classification Model

2nd Best Project, Hackathon: Collective Violence Early Warning

2/2023

Developed an Indonesia's Risk Map for Identifying the Impact and the Effectiveness of Interventions

SELECTED PROJECTS

A Computational Framework for Comparative Analysis of Free Trade Agreements

Text Analysis: Engineered a text segmentation and classification model to automate the comparative analysis of divergent policy rules across overlapping trade agreements

Chicago Crash Risk Intelligence Platform

Spatial Analysis: Built predictive models on 800K+ crash records using classification and DBSCAN clustering to identify high-risk intersections and spatial hotspots

Dynamic Trade Circumvention Dashboard

Trade Analysis: Developed analytics dashboard using Share-Shift and Trade Intensity metrics to detect anomalies indicative of trade circumvention

Modeling Post-Study Work Pathways under Policy Shock

Economic Modeling: Designed elasticity-based simulation to assess impact of H-1B fee changes on OPT and CPT pathways
